

Include multiple scoring notes in your assessment data!

Dear AEPSi User,

You now have the ability to include multiple scoring notes when you enter assessment data. There are six total scoring notes available: A, B, D, M, Q, and R.

When you want to enter more than one scoring note for a particular AEPS item, enter the scoring notes separated by commas.

**To enter multiple scoring notes, type the scoring note separated by a comma.**

Refer to the table below to find out what scores and scoring note combinations are possible.

### Scoring Notes Guidelines

Note	Definition	Guideline
A	Assistance Provided	If assistance is provided, then the only scores allowed are 1 and 0 because a score of 2 indicates full independent performance.
B	Behavior interfered	Only scores of 1 and 0 are allowed when a scoring note of B is used.
D	Direct Test	When the examiner directly elicits a behavior, a D is noted next to the performance score.
M	Modification/Adaptation	When modifications are made in gathering child performance information, an M is noted next to the performance score and a 2, 1, or 0 is used
Q	Quality of Performance	When the quality of the performance is in question, teams are encouraged to use a Q in the notes accompanied by a score of 2 or 1.
R	Report	When an item is assessed by report, an R is noted next to the performance score.
